Read the following passage and mark the letter A, B, C, or D on your answer sheet to indicate the correct answer to each of the questions from 61 to 70.

Today we take electricity for granted and perhaps we do not realize just how useful this discovery has been. Steam was the first invention that replaced wind power. It was used to drive engines and was passed through pipes and radiators to warm rooms. Petrol mixed with air was the next invention that provided power. Exploded in a cylinder, it drove a motor engine. Beyond these simple and direct uses, those forms have not much adaptability.

On the other hand, we make use of electricity in thousands of ways. From the powerful voltages that drive our electric trains to the tiny current needed to work a simple calculator, and from the huge electric magnet in steel works that can lift 10 tons to the tiny electric magnet in a doorbell, all are powered by electricity. An electric current can be made with equal ease to heat a huge mass of molten metal in a furnace, or to boil a jug for a cup of coffee.

Other than atomic energy, which has not as yet been harnessed to the full, electricity is the greatest power in the world. It is flexible, and so adaptable for any task for which it is wanted. It travels so easily and with incredible speed along wires or conductors that it can be supplied instantly over vast distances.

To generate electricity, huge turbines or generators must be turned. In Australia they use coal or water to drive this machinery. When dams are built, falling water is used to drive the turbines without polluting the atmosphere with smoke from coal.

Atomic power is used in several countries but there is always the fear of an accident. A tragedy once occurred at Chernobyl, in Ukraine, at an atomic power plant used to make electricity. The reactor leaked, which caused many deaths through radiation.

Now scientists are examining new ways of creating electricity without harmful effects to the environment. They may harness the tides as **they** flow in and out of bays. Most importantly, they hope to trap sunlight more efficiently. We do use solar heaters for swimming pools but as yet improvement in the capacity of the solar cells to create more current is necessary. When this happens, electric cars will be viable and the world will rid itself of the toxic gases given off by trucks and cars that burn fossil fuels.

- Question 61:** The author mentions the sources of energy such as wind, steam, petrol in the first paragraph to _____.
 A. suggest that electricity should be alternated with safer sources of energy
 B. emphasize the usefulness and adaptability of electricity
 C. imply that electricity is not the only useful source of energy
 D. discuss which source of energy can be a suitable alternative to electricity

- Question 62:** Before electricity, what was sometimes passed through pipes to heat rooms?
 A. Gas. B. Petrol. C. Hot wind. D. Steam.
- Question 63:** What does the author mean by saying that electricity is flexible?
 A. It can be adapted to various uses. B. It is used to drive motor engines.
 C. It can be made with ease. D. It is cheap and easy to use.
- Question 64:** What do we call machines that make electricity?
 A. Voltages. B. Electric magnets.
 C. Generators or turbines. D. Pipes and radiators.
- Question 65:** The main forms of power used to generate electricity in Australia are _____.
 A. atomic power and water B. water and coal
 C. sunlight and wind power D. wind and gas
- Question 66:** The word "**they**" in the last paragraph refers to _____.
 A. new ways B. the tides C. scientists D. harmful effects
- Question 67:** Electric magnets are used in steel works to _____.
 A. boil a jug of water B. lift heavy weights up to ten tons
 C. heat the molten steel D. test the steel for strength
- Question 68:** The advantage of harnessing the power of the tides and of sunlight to generate electricity is that they _____.
 A. do not pollute the environment B. are more reliable
 C. are more adaptable D. do not require attention
- Question 69:** Which of the following power sources causes pollution by emitting harmful gases?
 A. Sunlight. B. Water. C. Petrol. D. Wind.
- Question 70:** The best title for this passage could be _____.
 A. "Types of Power Plants" B. "Why Electricity Is So Remarkable"
 C. "How to Produce Electricity" D. "Electricity: Harmful Effects on Our Life"

Read the following passage and mark the letter A, B, C, or D on your answer sheet to indicate the correct answer to each of the questions from 71 to 80.

If parents bring up a child with the sole aim of turning the child into a genius, they will cause a disaster. According to several leading educational psychologists, this is one of the biggest mistakes which ambitious parents make. Generally, the child will be only too aware of what his parents expect, and will fail. Unrealistic parental expectations can cause great damage to children.

However, if parents are not too unrealistic about what they expect their children to do, but are ambitious in a sensible way, the child may succeed in doing very well – especially if the parents are very supportive of their child.

Michael Collins is very lucky. He is **crazy about** music, and his parents help him a lot by taking him to concerts and arranging private piano and violin lessons for him. **They** even drive him 50 kilometers twice a week for violin lessons. Michael's mother knows very little about music, but his father plays the trumpet in a large orchestra. However, he never makes Michael enter music competitions if he is **unwilling**.

Winston Smith, Michael's friend, however, is not so lucky. Both his parents are successful musicians, and they set too high a standard for Winston. They want their son to be as successful as they are and so they enter him for every piano competition held. They are very unhappy when he does not win. Winston is always afraid that he will disappoint his parents and now he always seems quiet and unhappy.

- A. Michael's mother
 - B. Michael's father
 - C. Winston's father
 - D. Winston's mother
- Question 79:** The word "**unwilling**" in the passage mostly means _____.
- A. "getting ready to do something"
 - B. "eager to do something"
 - C. "not objecting to doing anything"
 - D. "not wanting to do something"
- Question 80:** The two examples given in the passage illustrate the principle that _____.
- A. successful parents always have intelligent children
 - B. successful parents often have unsuccessful children
 - C. parents should let the child develop in the way he wants
 - D. parents should spend more money on the child's education
